RENDER

Atlantis Breeze — Master Render

An overall view of the five-villa enclave at Atlantis Breeze. Each two-storey residence is positioned to maximise privacy, light and cross-breeze, set within a 1,000 m² landscaped plot in quiet Padang-Padang, just minutes from Uluwatu's beaches.

RENDER

Villa Exterior & Private Pool

Each villa includes its own private pool with a glass viewing window into the living area. Sliding walls open the ground floor to the garden and pool deck, blurring the line between inside and out.

RENDER

Facade at Dusk

Vaulted timber-clad gables and warm interior lighting give the villas a calm, hospitality-grade presence after sunset — ideal for premium nightly rental positioning.

RENDER

Pool & Garden

Tropical landscaping wraps the pool deck with frangipani, palms and stone — a low-maintenance, climate-appropriate planting palette designed for Bali's seasons.

RENDER

Open-Plan Living

Three-metre ceilings, full-height glazing and natural materials define the open-plan living, dining and kitchen area. A double vanity and freestanding tub anchor the principal en-suite.

RENDER

Principal Bedroom

Walnut joinery, soft natural stone and concealed lighting create a calm sleeping suite. Bedrooms are positioned for cross-ventilation and morning light without afternoon heat.

RENDER

Entry & Architecture

Stone, vertical timber battens and a sheltered carport form the entry sequence. Aluminium joinery, thermal ceiling insulation and concrete additives are specified throughout for longevity in the tropics.
